Portfolio

## SUMMARY

Software Engineer with experience building modern web applications using React, Next.js, TypeScript, and database-driven technologies. Experienced in developing responsive interfaces, integrating APIs and backend services, and delivering end-to-end web solutions. Also brings enterprise software experience with SAP ABAP and ECM, providing a strong foundation in business systems and software development.

## TECHNICAL SKILLS

### FRONTEND

- React
- Next.js
- Vite
- Tailwind CSS
- shadcn/ui
- Responsive Web Design
- React Hooks
- App Router

### BACKEND

- Supabase
- PostgreSQL
- Firebase
- Firestore
- REST APIs

### MOBILE DEVELOPMENT

- Flutter
- React Native
- Expo
- React Navigation
- Expo Libraries

### DEVELOPMENT PRACTICES

- Component-based architecture
- Responsive UI development
- State management
- API integration
- Debugging & troubleshooting
- Performance optimization
- AI-assisted software development

## EXPERIENCE

***FRONT-END WEB DEVELOPER (REACT)*** Jun 2022 - Present

**Personal - Freelance**

- Built responsive web applications using React
- Delivered client projects independently, including media-related websites
- Translated client requirements into functional and user-friendly interfaces
- Maintained performance and responsiveness across different devices

***ECM CONSULTANT*** Jul 2025 - Aug 2025

**ASSET Technology Group - Internship**

- Supported enterprise content management processes and workflows.
- Worked with digital documents, data organization, and enterprise information systems.
- Collaborated with team members to understand business requirements and system workflows.

***SAP ABAP CONSULTANT / BTP CONSULTANT*** Feb 2024 - Jun 2025

**Accely - Full Time**

- Developed SAP solutions including reports, ALV reports, and Adobe Forms.
- Debugged and enhanced existing SAP programs to support business requirements and improve system performance.
- Developed and maintained function modules and backend functionality.
- Progressed from internship to full-time employment based on performance.
- Gained practical exposure to SAP BTP and enterprise software environments.

# EDUCATION

**BACHELOR OF COMPUTER SCIENCE**

Modern University for Technology & Information (MTI) — Cairo, Egypt
Graduated 2024
Graduation Project: A

# LANGUAGES

- Arabic (Native or Bilingual)
- English (Full professional proficiency)
- French (Elementary)
- Spanish (Elementary)

# MILITARY SERVICE

**Finished 2025 - 2026**

# EXPERIENCE

***SOFTWARE ENGINEER INTERN.*** Jan 2023 - Feb 2024

**ALX - Internship**

- Completed hands-on training in software engineering fundamentals
- Built foundational skills in programming, problem-solving, and algorithms
- Worked on practical projects simulating real-world development scenarios
- Strengthened understanding of software development workflows

# PROJECTS

**Oyoun — Eye Health Dictionary (Website)** **live demo**

- Built a bilingual Arabic/English eye-health encyclopedia using Next.js 16, React, and TypeScript. Provides searchable eye disease information with search autocomplete, disease detail pages, eye anatomy guides, prevention tips, interactive doctor maps using Leaflet, RTL/LTR localization, and persistent theme/language preferences.

**BRDG (Website + App)**

- Designed an e-commerce marketplace platform connecting Egyptian consumers with local brands. Focused on mobile-first product discovery, local brand exposure, delivery partner integration, virtual try on/measurement flows, and streamlined return management.

**Personal Portfolio (Website)** **live demo**

- Role: Developer
- Type: Personal Project
- Status: Completed / Active
- Stack: React · TypeScript · Vite · Tailwind CSS · Framer Motion

**Graduation Project (Home sphere) (Website + App)** **live demo**

- Created a responsive web dashboard for a smart home IoT system as a university graduation project. Designed intuitive UI controls for smart devices, state toggles, and real-time room analytics.
